Introduction

Purpose of the User Guide

This user guide explains how to use **TravelPlanner**, a travel planning application that helps users search destinations, create trips, book accommodations, explore activities, and manage transportation.

Target Users

This guide is intended for:

- Travelers planning personal or group trips
- Registered users managing bookings
- New users who need help navigating the app

Main Features

The application allows users to:

- Browse travel destinations
- View destination details
- Search accommodations
- Book rooms or trips
- Explore activities
- Search transportation options
- Manage personal bookings
- Log in, register, and manage user profiles

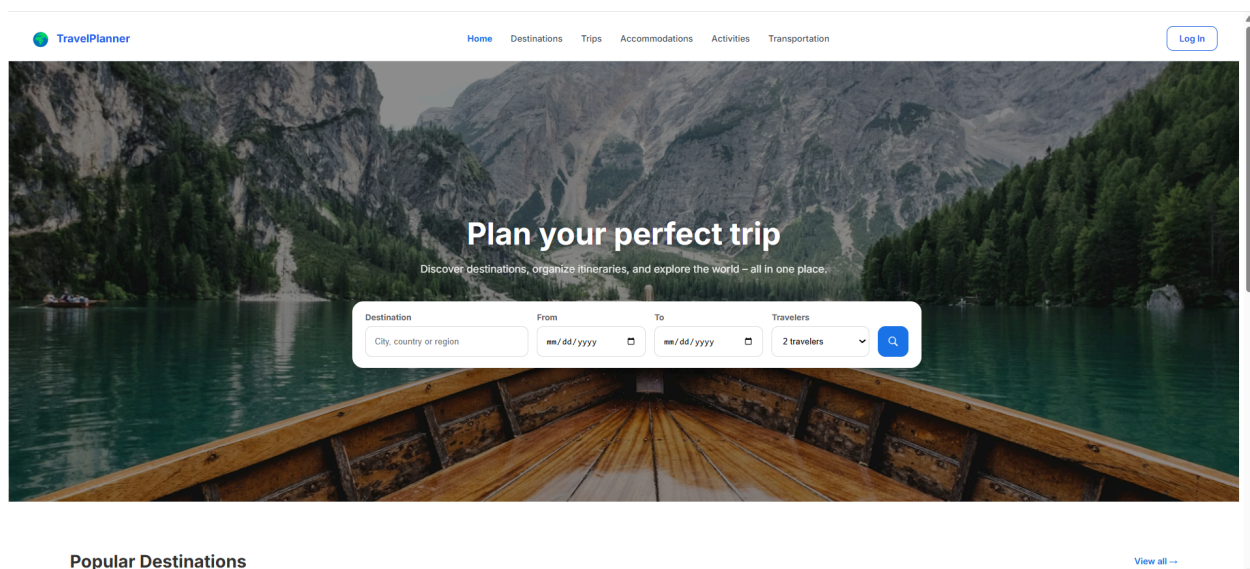

Home Screen - browsing, search engine and navigation

The **Home screen** is the starting point of the TravelPlanner application. It introduces the user to the main purpose of the system, which is to help users discover destinations, organize itineraries, and explore travel options in one place. At the top of the screen, there is a navigation bar with links to the main sections of the application, including **Home**, **Destinations**, **Trips**, **Accommodations**, **Activities**, and **Transportation**. The **Log In** button is located on the right side and allows users to access their account.

The central part of the screen contains a large search area with the title “**Plan your perfect trip**” (**Home Screen Search**). Users can enter a destination, select the travel dates, choose the number of travelers, and start the search. This screen is designed to provide quick access to the main trip-planning functionality and guide users toward finding suitable travel options.

How to use this section (*Home Screen Search*):

1. Enter a city, country, or region in the **Destination** field.
2. Select the start date in the **From** field.
3. Select the end date in the **To** field.
4. Choose the number of travelers from the **Travelers** dropdown.
5. Click the blue **Search** button to continue.

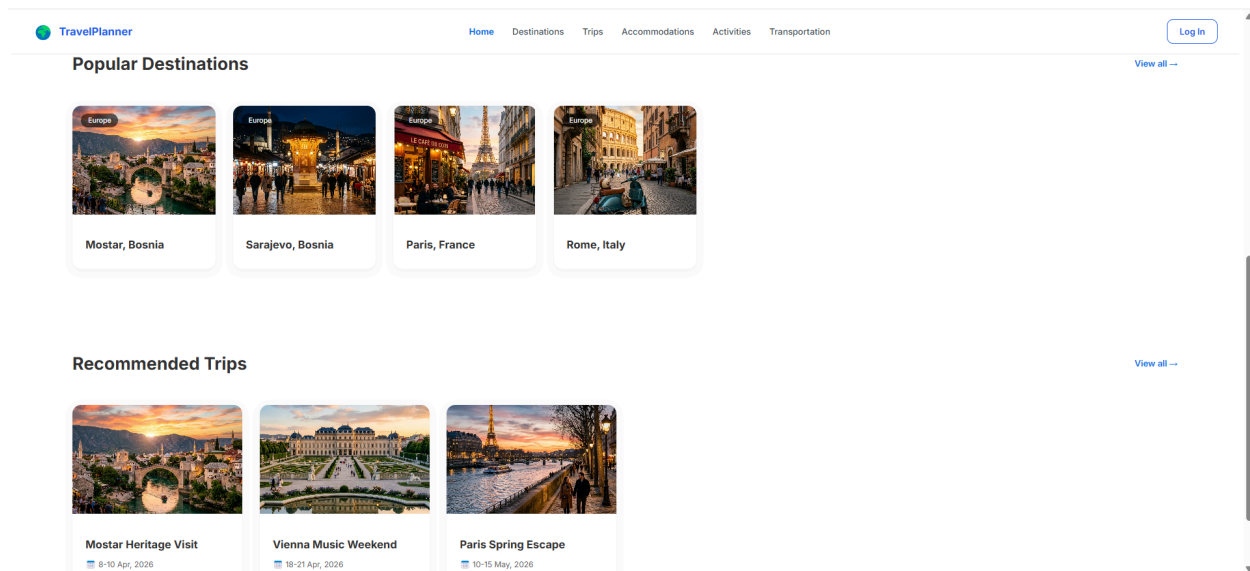

Home Screen Search

After scrolling down, the user can browse **Popular Destinations** and **Recommended Trips** and select an option they may want to explore further (Home Screen Browse). The **View all** link allows users to open the full list of available destinations/trips.

How to use this section (Home Screen Browse):

1. Review the destination cards under **Popular Destinations**.
2. Click a destination card to view more details about that location.
3. Use **View all** to open the complete destinations list.
4. Review the cards under **Recommended Trips**.
5. Click a recommended trip to see more information about the itinerary, dates, and available options.

Home Screen Browse

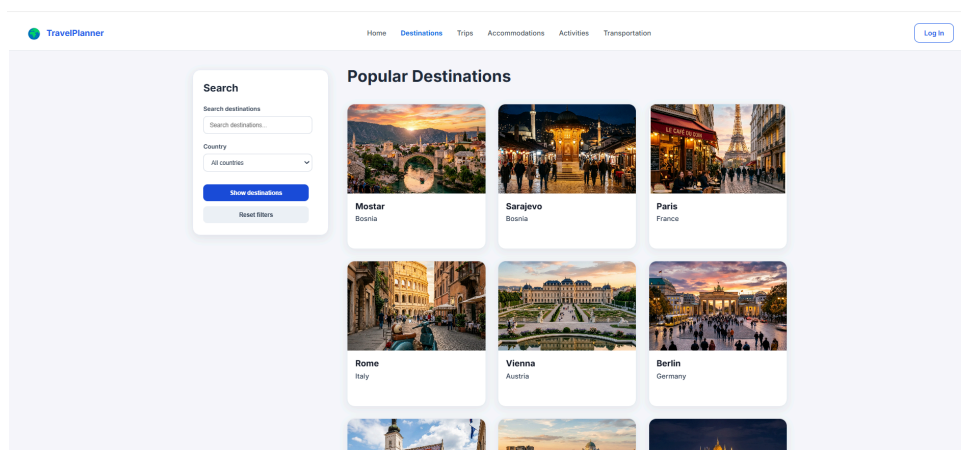

Destinations Screen - browsing destinations

The **Destinations screen** allows users to browse available travel destinations in the application. The main part of the screen displays a grid of destination cards, each containing an image, destination name, and country. Examples shown on this screen include **Mostar**, **Sarajevo**, **Paris**, **Rome**, **Vienna**, and **Berlin (Destinations Screen)**. This layout helps users visually compare destinations and quickly choose a location they are interested in visiting.

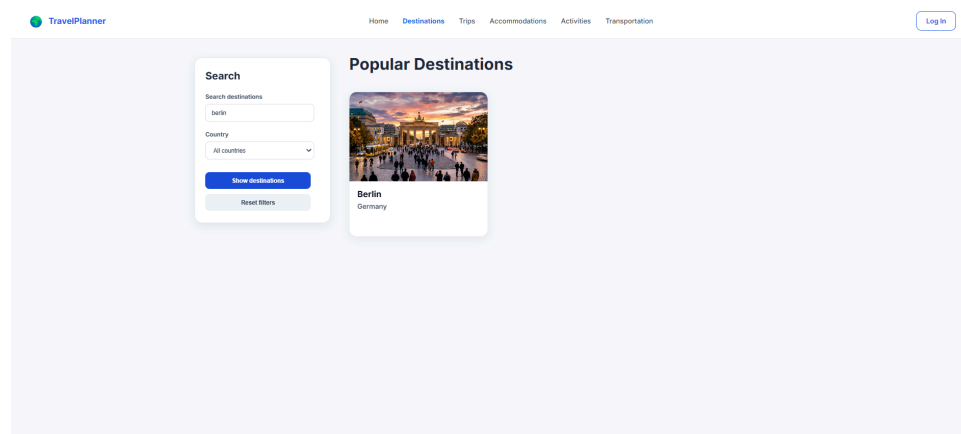

On the left side of the screen, there is a **Search** panel that helps users filter the destination list. Users can search for a destination by entering a name in the search field or narrow the results by selecting a specific country from the dropdown menu. The **Show destinations** button applies the selected filters, while the **Reset filters** button clears the search and displays the default list again.

How to use this screen:

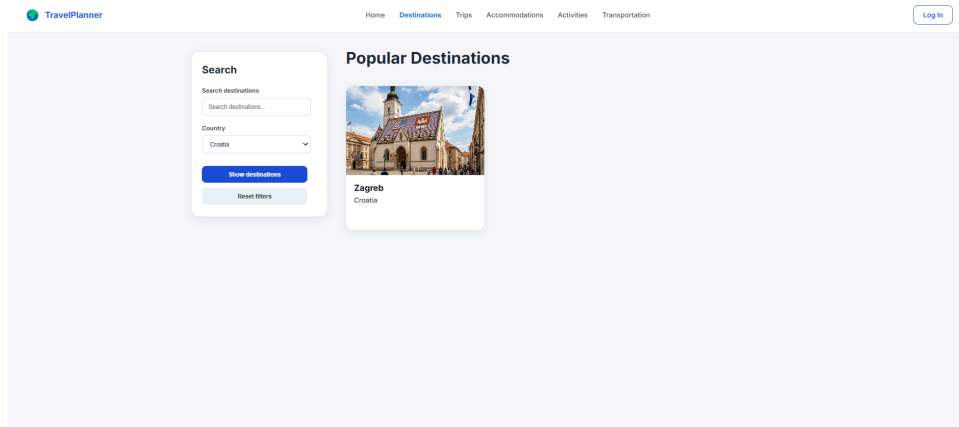

1. Open the **Destinations** page from the navigation bar.
2. Enter a destination name in the **Search destinations** field, if needed (Destination Screen filter by city).
3. Select a country from the **Country** dropdown, if needed (Destination Screen filter by country).
4. Click **Show destinations** to apply the filters.
5. Click **Reset filters** to clear the selected filters.
6. Select a destination card to view more information about that destination.

Destinations Screen

Destination Screen filter by city

Destination Screen filter by country

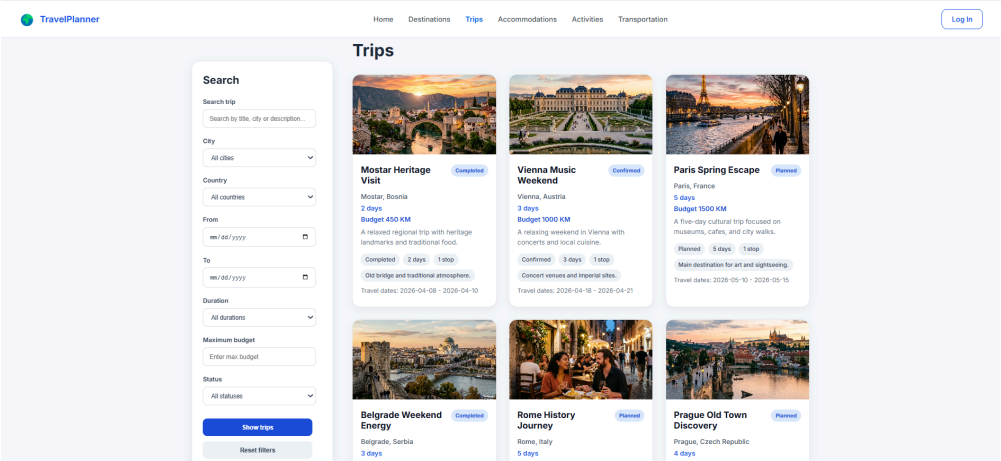

Trips Screen - browsing trips (travel plans)

The **Trips screen** allows users to browse available travel plans and review basic information about each trip. The main area displays trip cards with an image, trip title, destination, duration, budget, short description, status, tags, and travel dates. Each card gives users a quick overview of the trip so they can compare different travel options before opening more details.

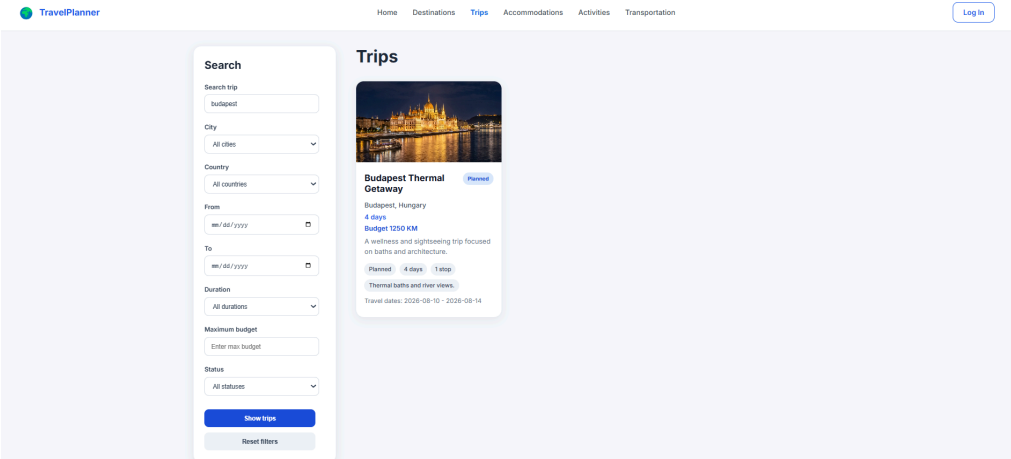

On the left side of the screen, there is a **Search** panel used for filtering trips. Users can search by title, city, or description, and they can also filter trips by city, country, start and end dates, duration, maximum budget, and trip status (Trips Screen filter by city, Trips Screen filter by dates). The **Show trips** button applies the selected search criteria, while **Reset filters** clears all filters and restores the default list of trips.

How to use this screen:

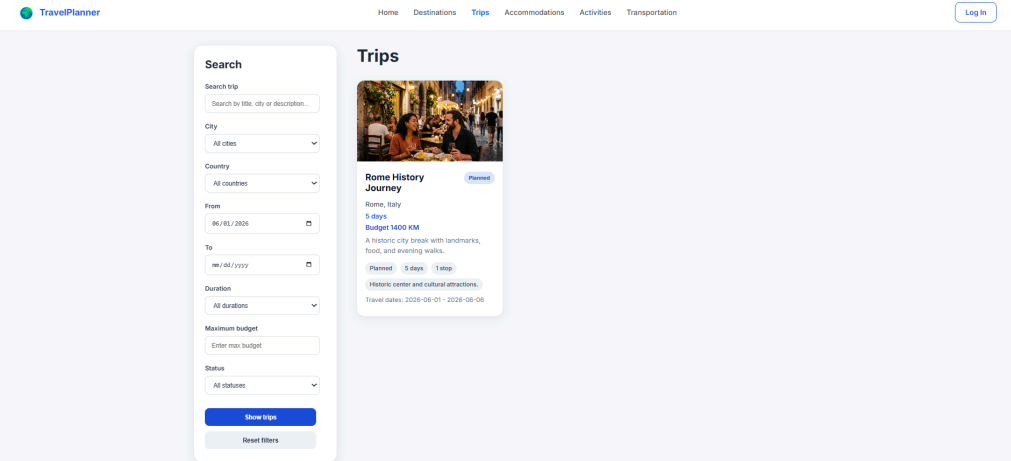

1. Open the **Trips** page from the navigation bar.
2. Enter a keyword in the **Search trip** field, if needed.
3. Select filters such as **City**, **Country**, **From**, **To**, **Duration**, **Maximum budget**, or **Status** (**Trips Screen filter by city**, **Trips Screen filter by dates**).
4. Click **Show trips** to display trips that match the selected criteria.
5. Click **Reset filters** to remove all filters.
6. Select a trip card to view more details about the selected travel plan.

Trips Screen

Trips Screen filter by city

Trips Screen filter by dates

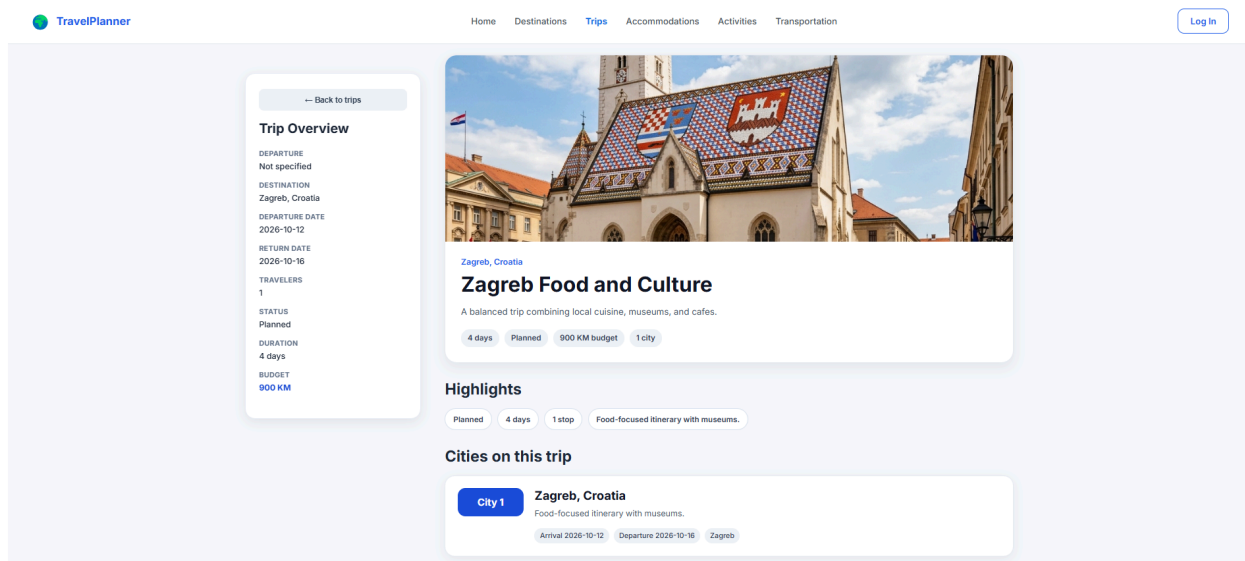

Trip Details Screen - checking trip details

The **Trip Details screen** opens after the user selects a specific trip from the Trips page. This screen provides a complete overview of the selected travel plan, including the trip image, destination, title, short description, duration, status, budget, and number of cities included in the trip. In the example shown, the selected trip is **Zagreb Food and Culture**, with details such as destination **Zagreb, Croatia**, planned travel dates, one traveler, and a budget of **900 KM** (**Trip Details Screen pt. 1, Trip Details Screen pt.2**).

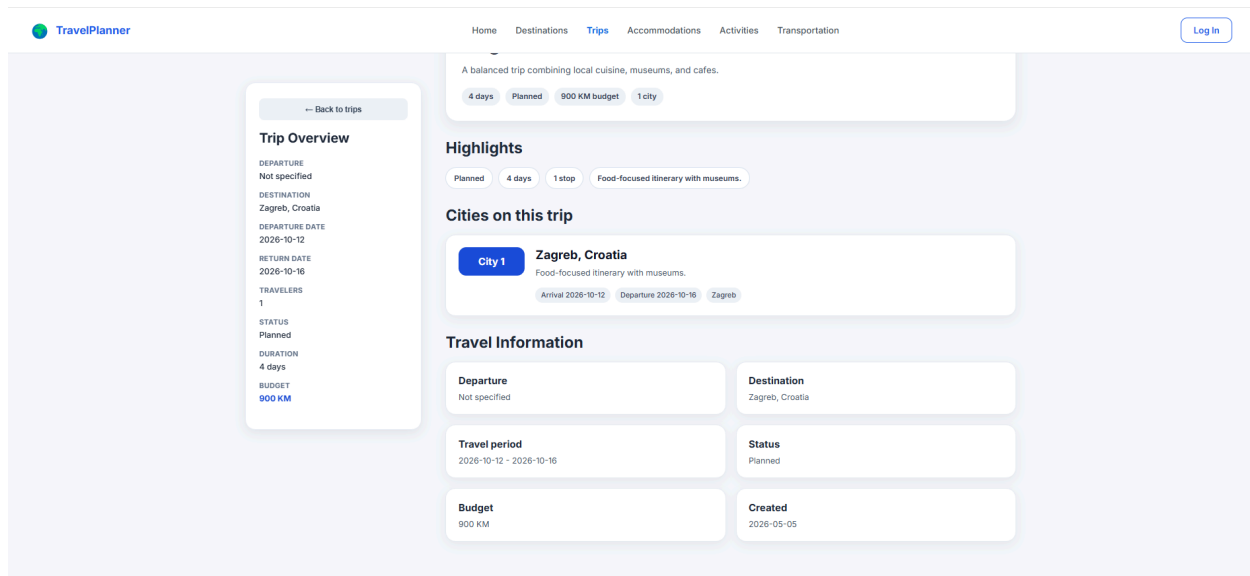

The left side of the screen contains a **Trip Overview** panel with the most important trip information, such as departure location, destination, departure date, return date, number of travelers, status, duration, and budget. The main content area includes **Highlights**, which summarize the main characteristics of the trip, and a **Cities on this trip** section, where users can see which cities are included in the itinerary. Further down, the **Travel Information** section presents the trip details in separate information cards, making it easier to review the departure, destination, travel period, status, budget, and creation date.

How to use this screen:

1. Open the **Trips** page.
2. Select a trip card from the list of available trips.
3. Review the **Trip Overview** panel on the left side.
4. Check the main trip details, including title, destination, description, status, duration, budget, and cities.
5. Scroll down to view the **Travel Information** section.
6. Click **Back to trips** to return to the list of available trips.

Trip Details Screen pt. 1

Trip Details Screen pt. 2

Accommodation Screen - browse accommodation

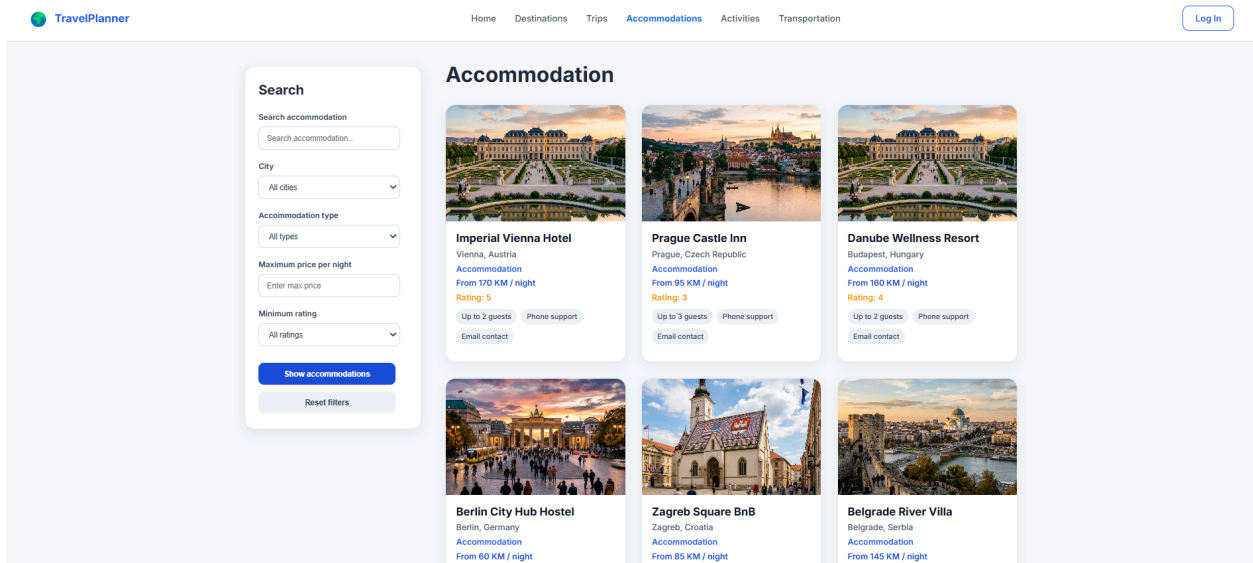

The **Accommodation screen** allows users to browse available accommodation options for different cities and destinations. The main area displays accommodation cards with an image, accommodation name, city and country, accommodation type, price per night, rating, capacity, available support options, and an email contact button. Examples shown on this screen include hotels, inns, resorts, hostels, bed and breakfasts, and private villas in cities such as Vienna, Prague, Budapest, Berlin, Zagreb, Belgrade, and Rome (Accommodation Screen).

On the left side of the screen, there is a **Search** panel that helps users filter accommodation results. Users can search by accommodation name, select a city (Accommodation Screen filter by city), choose an accommodation type, enter a maximum price per night, and select a minimum rating. The **Show accommodations** button applies the selected filters and displays matching results, while the **Reset filters** button clears the filters and returns the list to its default state.

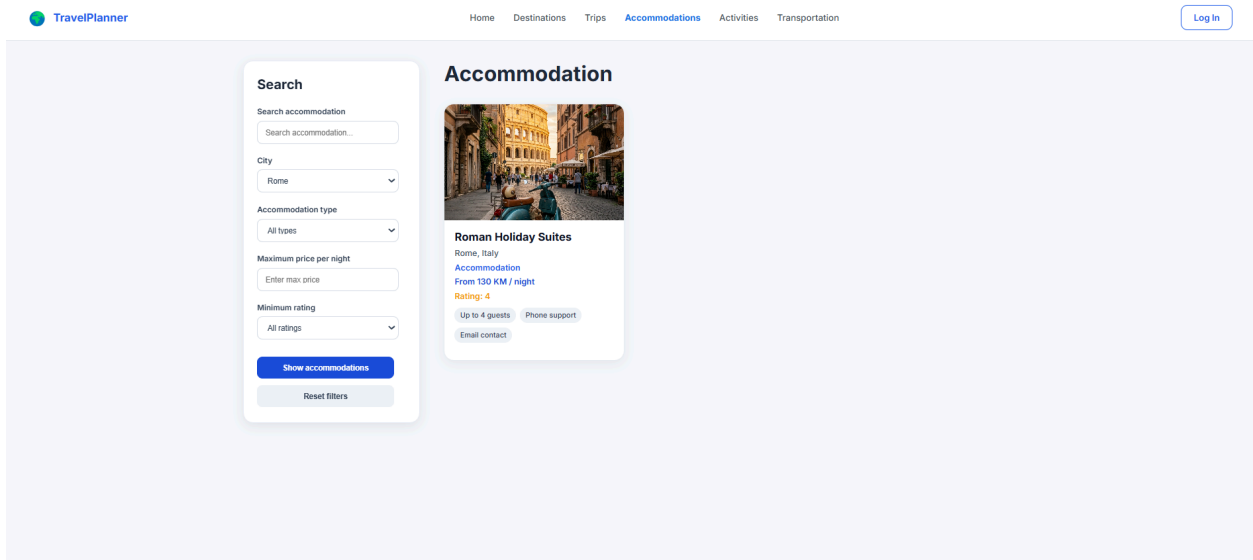

How to use this screen:

1. Open the **Accommodations** page from the navigation bar.
2. Enter an accommodation name in the **Search accommodation** field, if needed.
3. Select a **City** from the dropdown menu (Accommodation Screen filter by city).
4. Select an **Accommodation type** from the dropdown menu, if needed.

5. Enter the **Maximum price per night**, if needed.
6. Select the **Minimum rating**, if needed.
7. Click **Show accommodations** to view matching accommodation options.
8. Click **Reset filters** to clear all filters.
9. Review the accommodation cards and select the desired accommodation for more details.

Accommodation Screen

Accommodation Screen filter by city

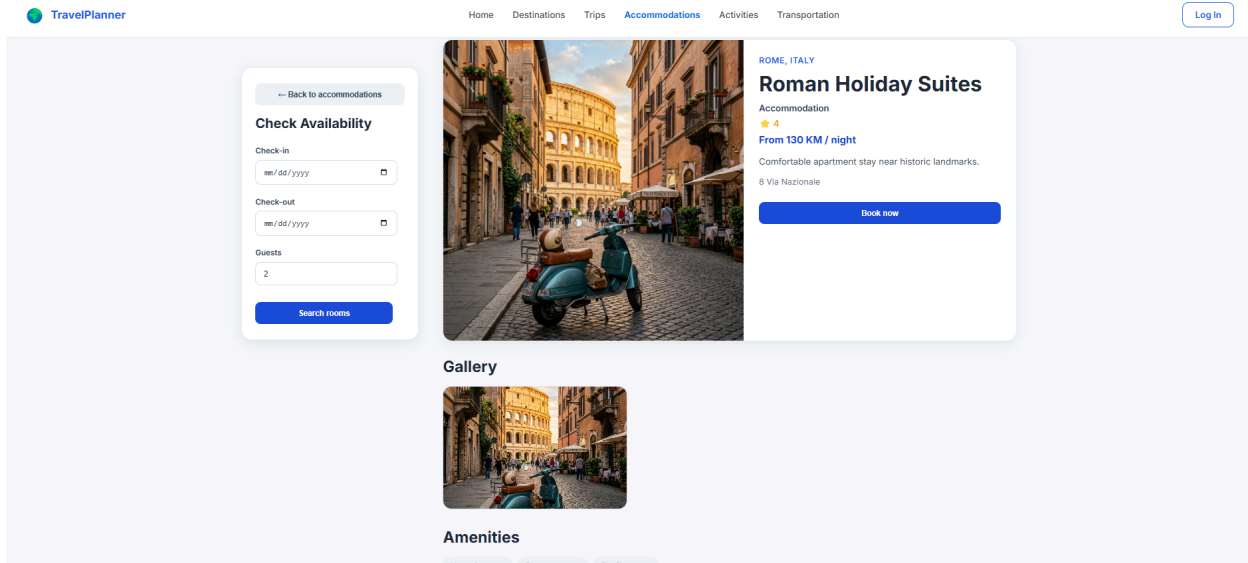

Accommodation Details Screen - check accommodation details and book

The **Accommodation Details screen** opens after the user selects a specific accommodation from the Accommodations page. This screen provides more detailed information about the selected accommodation, including its image, location, name, accommodation type, rating, price per night, short description, and provider information. In the example shown, the selected accommodation is **Roman Holiday Suites** in **Rome, Italy**, with a price of **130 KM per night** (**Accommodation Details Screen**).

On the left side of the screen, there is a **Check Availability** panel where users can enter check-in and check-out dates and specify the number of guests. The **Search rooms** button allows the user to check available rooms for the selected period. The main content area also includes a **Gallery** section with accommodation images and an **Amenities** section that shows available features such as guest capacity, phone support, and email contact. If the user clicks **Book now** while not logged in, the application redirects them to the login page because booking is only available for authenticated users. Additionally, if the user selects a number of guests exceeding the limit or leaves out the date field for booking, appropriate warnings are shown and the booking will not proceed until mistakes are corrected.

How to use this screen:

1. Open the **Accommodations** page.
2. Select an accommodation card to open its details.
3. Enter the **Check-in** date.
4. Enter the **Check-out** date.
5. Enter the number of **Guests**.
6. Click **Search rooms** to check availability.
7. Review the accommodation information, gallery, and amenities.
8. Click **Book now** to start the booking process.
9. If redirected to the login page, log in first and then continue with the booking.

Accommodation Details Screen

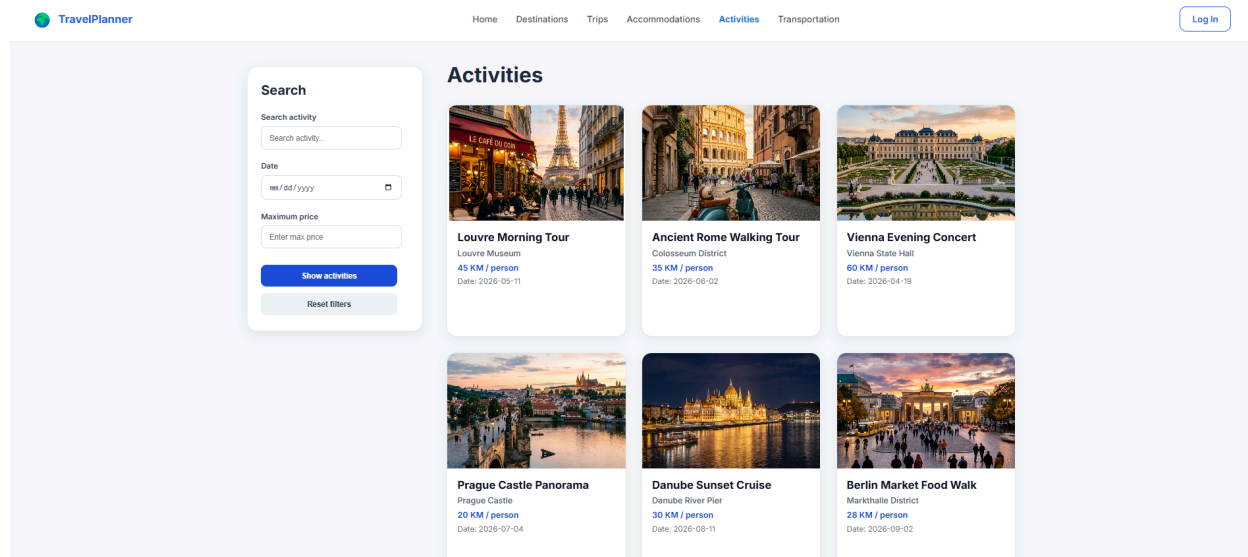

Activities Screen - browse activities

The **Activities screen** allows users to browse available activities and experiences offered in different destinations. The main area displays activity cards with an image, activity name, location, price per person, and scheduled date (Activities Screen). This screen helps users explore optional activities that can be included in their travel experience.

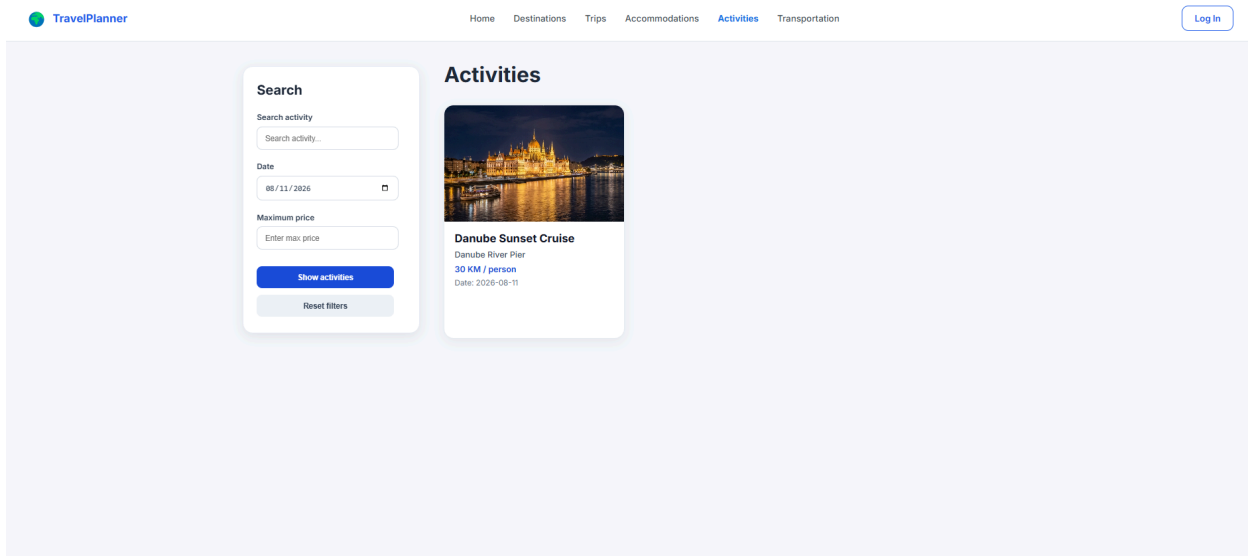

On the left side of the screen, there is a **Search** panel for filtering activities. Users can search for an activity by name, select a specific date, and enter a maximum price (Activities Screen filter by date). The **Show activities** button applies the selected filters and displays matching results, while the **Reset filters** button clears the search criteria and restores the default list of activities. In the example shown, filtering by date displays only the activity that matches the selected date.

How to use this screen:

1. Open the **Activities** page from the navigation bar.
2. Enter an activity name in the **Search activity** field, if needed.
3. Select a **Date**, if needed (Activities Screen filter by date).
4. Enter a **Maximum price**, if needed.
5. Click **Show activities** to display activities matching the selected filters.
6. Click **Reset filters** to clear the filters.
7. Review the activity cards to compare available experiences by location, price, and date.

Activities Screen

Activities Screen filter by date

Activity Details Screen - check activity details and add to trip

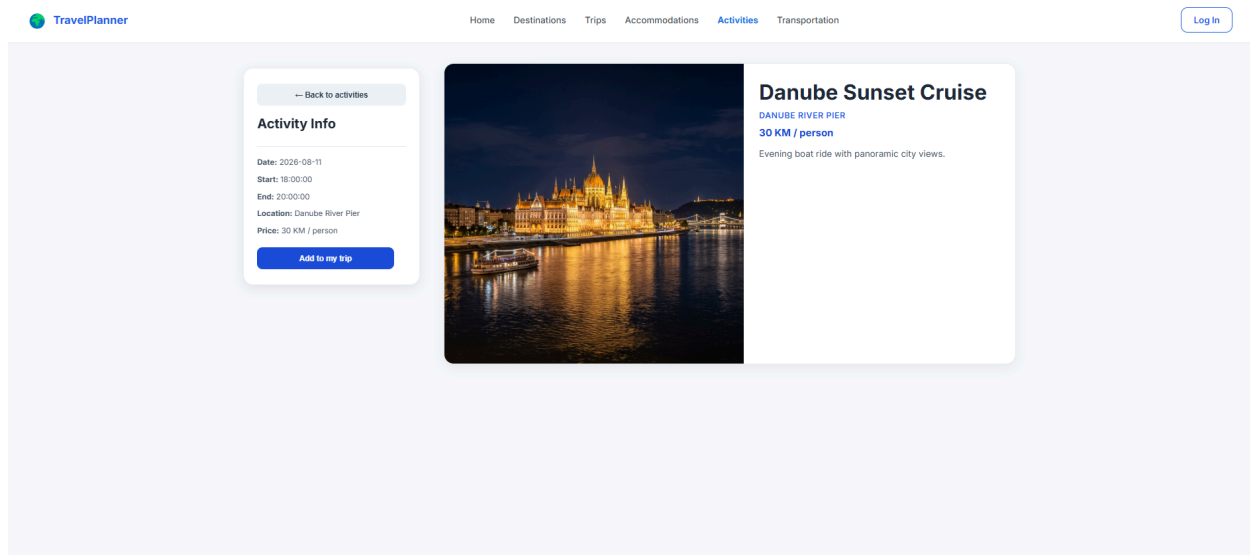

The **Activity Details screen** opens after the user selects a specific activity from the Activities page. This screen provides detailed information about the selected activity, including the activity image, title, location, price per person, and short description. In the example shown, the

selected activity is **Danube Sunset Cruise**, located at **Danube River Pier**, with a price of **30 KM per person**.

On the left side of the screen (Activity Details Screen), there is an **Activity Info** panel that summarizes the most important details, including the activity date, start time, end time, location, and price. The **Back to activities** button returns the user to the list of available activities. The **Add to my trip** button allows the user to add the selected activity to their travel plan. If the user is not logged in and clicks **Add to my trip**, the application redirects the user to the login page because this action requires authentication.

How to use this screen:

1. Open the **Activities** page.
2. Select an activity card to view more details.
3. Review the activity information, including date, time, location, price, and description.
4. Click **Back to activities** to return to the activity list.
5. Click **Add to my trip** to add the activity to a planned trip.
6. If redirected to the login page, log in first and then continue adding the activity to the trip.

Activity Details Screen

Transportation Screen - browse transportation

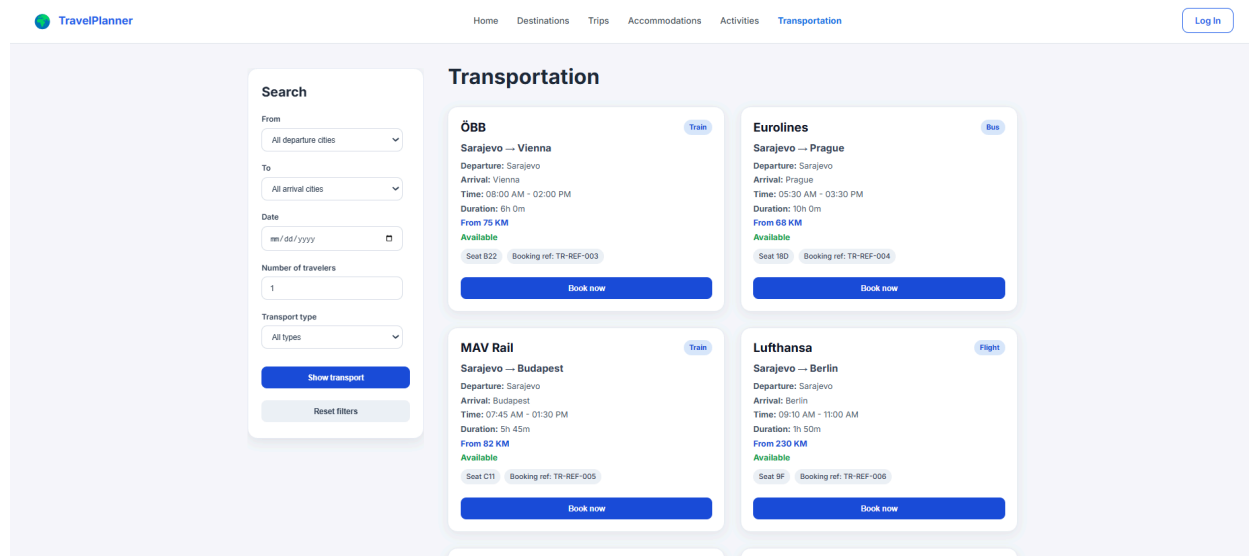

The **Transportation screen** allows users to browse available transport options between selected destinations. The main area displays transportation cards with information such as

provider name, route, departure location, arrival location, travel time, duration, price, availability status, seat information, booking reference, and transport type. The screen includes different types of transportation, such as **train**, **bus**, and **flight**, giving users multiple options for organizing travel between cities (Transportation Screen).

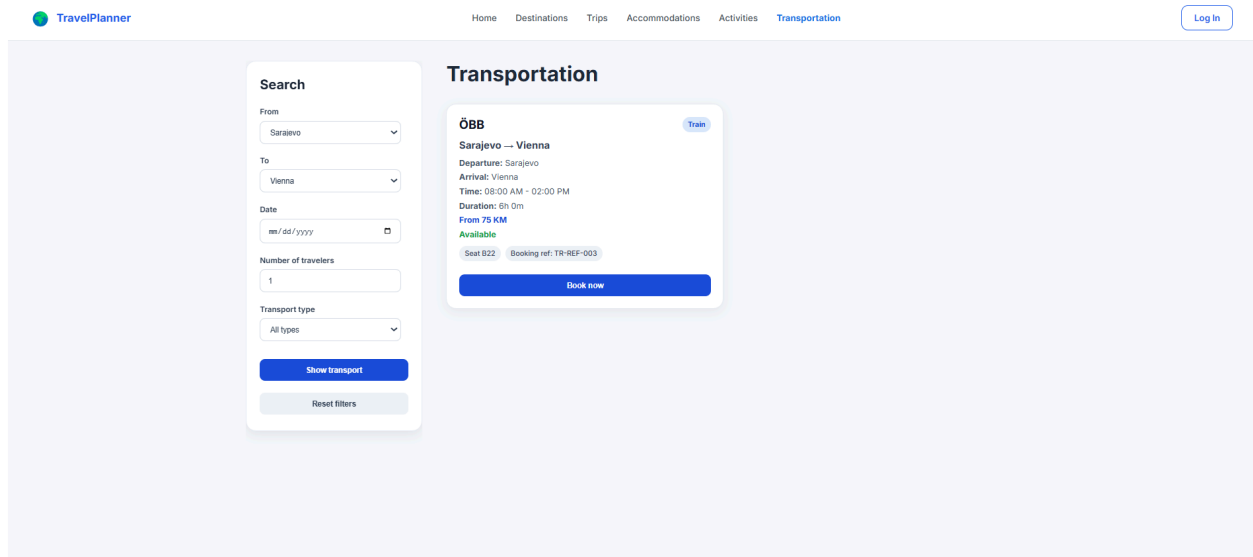

On the left side of the screen, there is a **Search** panel that helps users filter transportation results. Users can select the departure city, arrival city (Transportation Screen filter by city), travel date, number of travelers, and transport type. After applying the filters, the application displays only the transport options that match the selected criteria. If the user tries to book without entering all required information, a validation message appears, reminding the user to fill in all fields before continuing (Transportation Screen missing information error). If the user is not logged in, book now button will redirect to the login page.

How to use this screen:

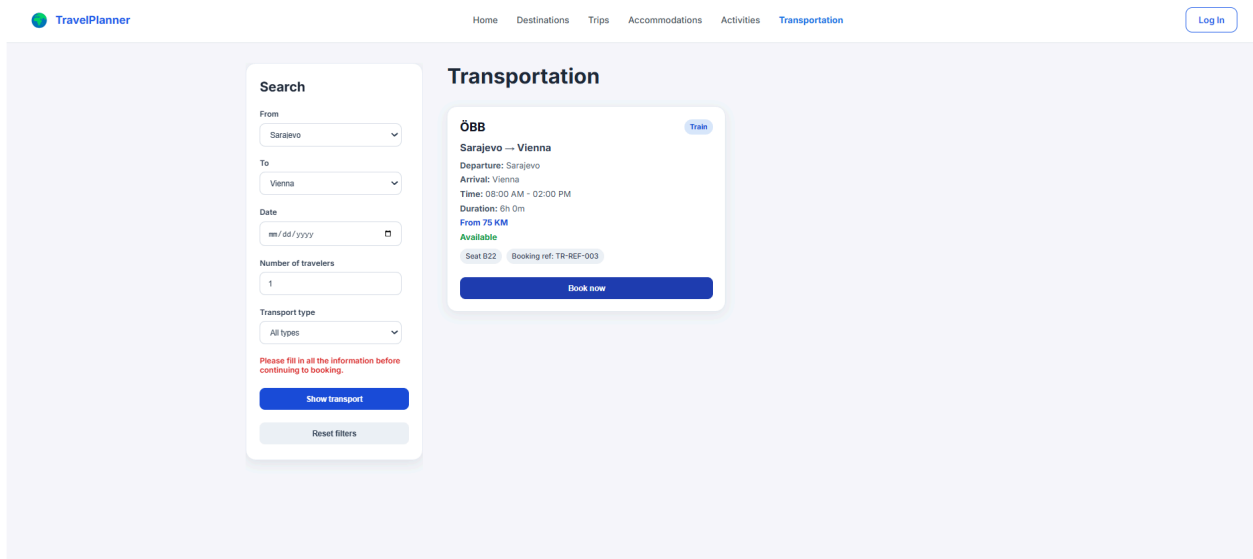

1. Open the **Transportation** page from the navigation bar.
2. Select the departure city in the **From** field.
3. Select the arrival city in the **To** field.
4. Choose the travel **Date**.
5. Enter the **Number of travelers**.
6. Select the **Transport type**, if needed.
7. Click **Show transport** to display matching transport options.
8. Click **Reset filters** to clear the selected filters.
9. Review the available transport cards and click **Book now** to start booking.
10. If the user is not logged in, clicking **Book now** redirects them to the login page.

Transportation Screen

Transportation Screen filter by city

Transportation Screen missing information error

Register Screen - create a new account

The **Register screen** allows new users to create an account in the TravelPlanner application. The screen is divided into two main parts: the left side contains a visual welcome section with the message “**Join Our Community**”, while the right side contains the **Create Account** form.

The user must enter personal account information, including first name, last name, email address, phone number, username, password, and password confirmation (Register Screen). The user must also accept the **Terms & Conditions** before the account can be created.

The registration form includes validation rules to make sure that the entered data is correct before submission (Register Screen invalid fields). If some fields are invalid, the application displays validation messages below the fields. For example, the first and last name must contain between 2 and 50 letters, the email must be in a valid format, the phone number must have the correct length, and the username must contain between 3 and 20 valid characters. The password must contain at least 8 characters, including one uppercase letter, one lowercase letter, and one number. The confirmation password must match the entered password. The application also checks whether the username or email address is already in use and displays an error message if either one already exists (Register Screen username/email already in use). Once all the fields are valid, the user is redirected to the login page (Register Screen all valid fields).

How to use this screen:

1. Open the registration page.
2. Enter your **First Name** and **Last Name**.
3. Enter a valid **Email Address**.
4. Enter a valid **Phone Number**.
5. Choose a unique **Username**.
6. Enter a valid **Password** that satisfies the password rules.
7. Re-enter the same password in the **Confirm Password** field.
8. Select the checkbox to agree to the **Terms & Conditions**.
9. Click **Create Account**.
10. If all information is valid, the application displays a success message and redirects the user to the login page (Register Screen all valid fields).

Login Screen - login to make bookings, add to trip and check user profile

The Login screen allows users to access their TravelPlanner account by entering their username and password. The page is divided into two visual sections: the left side presents the application branding with the message “**Explore the World**”, while the right side contains the login form. At the top of the page, users can still see the main navigation bar with links such as **Home**, **Destinations**, **Trips**, **Accommodations**, **Activities**, and **Transportation (Login Screen)**.

How to use this screen:

1. Open the **Login** screen by clicking the **Log In** button in the top-right corner of the navigation bar (Login Screen).
2. Enter your username in the **Username** field.
3. Enter your password in the **Password** field.
4. Click the **Sign In** button.
5. If the login details are correct, you will be signed into your account.

6. If the entered username or password is incorrect, the system will display the message **“Error: Bad credentials”** above the form (Login Screen bad credentials).
7. Check your username and password, then try signing in again.
8. If you do not have an account, click the **Create one** link below the form to open the registration screen.

My Profile Screen - check and edit user profile

The **My Profile** screen allows logged-in users to view and manage their personal account information (My Profile Screen default settings). The page displays the user's profile image, first name, last name, username, email address, and phone number. At the top of the screen, the navigation bar remains available, including links such as **Home**, **Destinations**, **Trips**, **Accommodations**, **Activities**, **Transportation**, and **My Bookings**. The profile icon is also shown in the top-right corner, making it easy for the user to recognize that they are logged in.

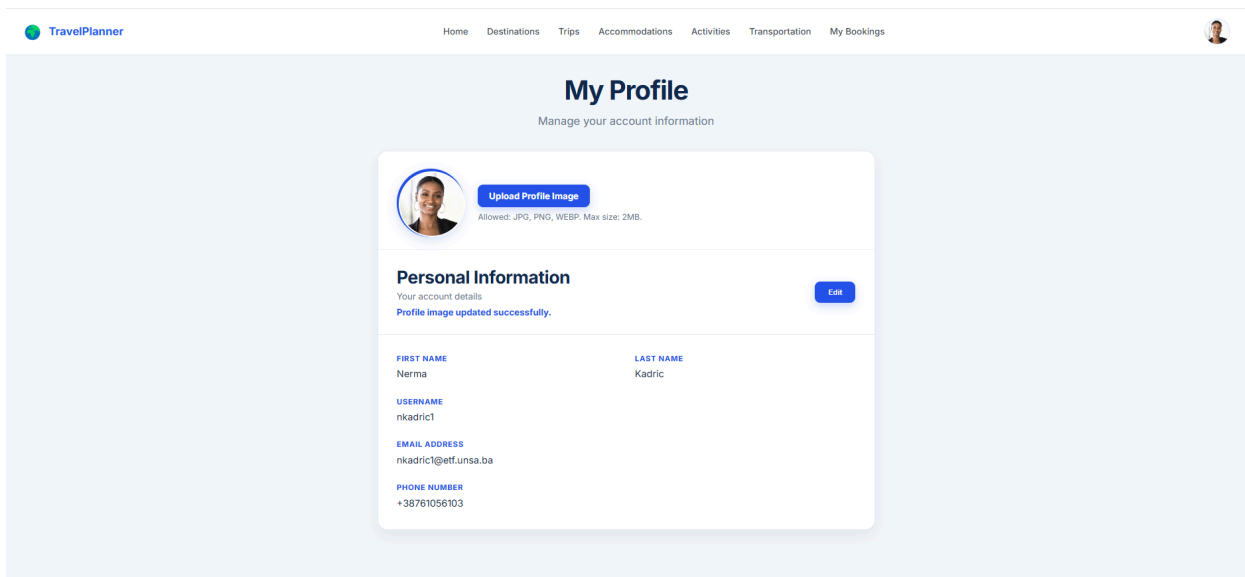

Users can also upload or change their profile image by clicking the **Upload Profile Image** button. After a successful upload, the system displays a confirmation message such as "**Profile image updated successfully.**" The uploaded image is then shown both on the profile card and in the navigation bar profile icon. All personal information on this screen can be edited by clicking the **Edit** button.

How to use this screen:

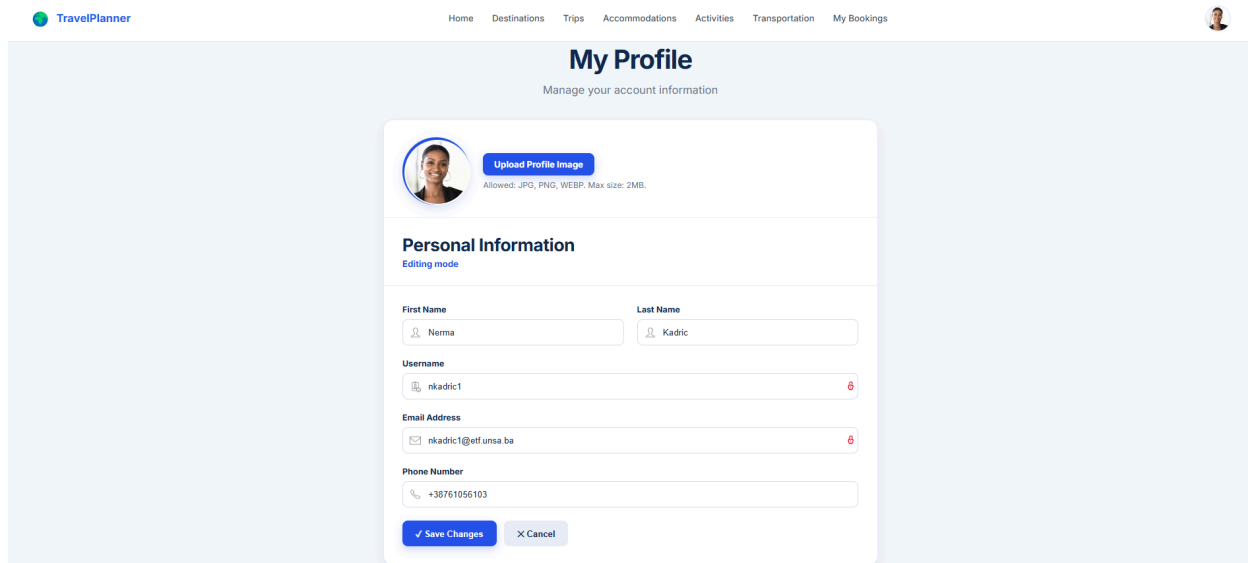

1. Open the **My Profile** screen by clicking the user/profile icon in the top right corner and selecting "My profile" from the dropdown menu (My Profile Screen default settings).
2. Review your personal information, including first name, last name, username, email address, and phone number.
3. To change your profile picture, click **Upload Profile Image**.
4. Select an image from your device.
5. After the image is uploaded successfully, the new profile picture will be displayed on the profile card and in the top-right navigation icon (My Profile Screen updated profile image).
6. To edit your personal information, click the **Edit** button.
7. The profile fields will become editable (My Profile Screen editing information).
8. Change the information you want to update, for example your phone number.
9. Click **Save Changes** to confirm the update.
10. After saving, the screen returns to profile view mode and displays the updated information (My Profile Screen updated information).
11. To discard changes while editing, click **Cancel**.

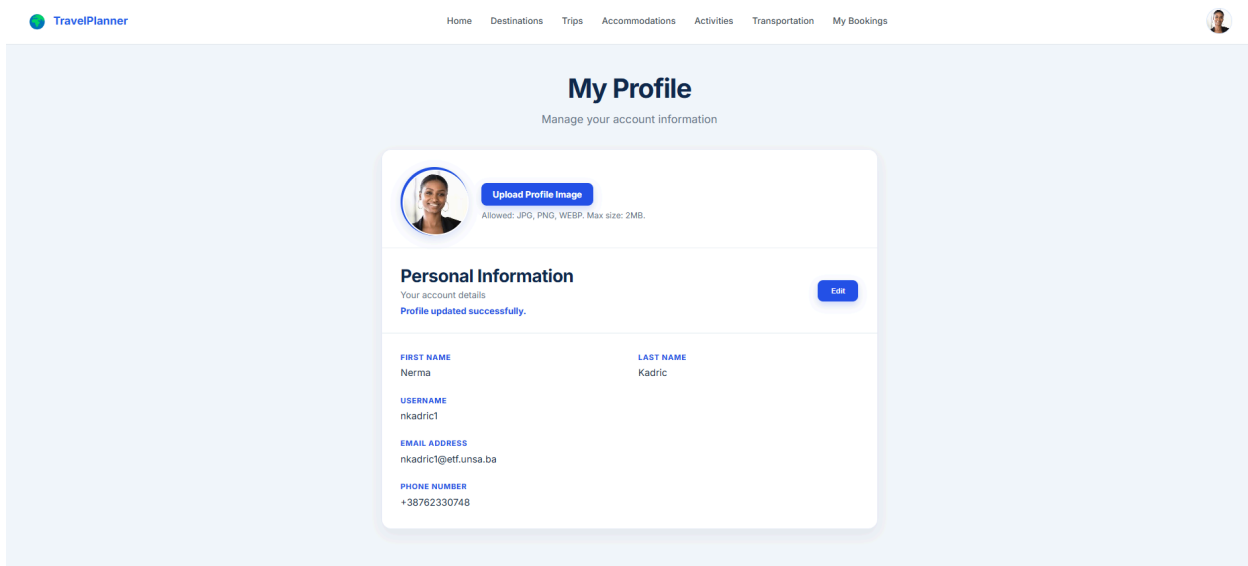

My Profile Screen default settings

My Profile Screen updated profile image

My Profile Screen editing information

My Profile Screen updated information

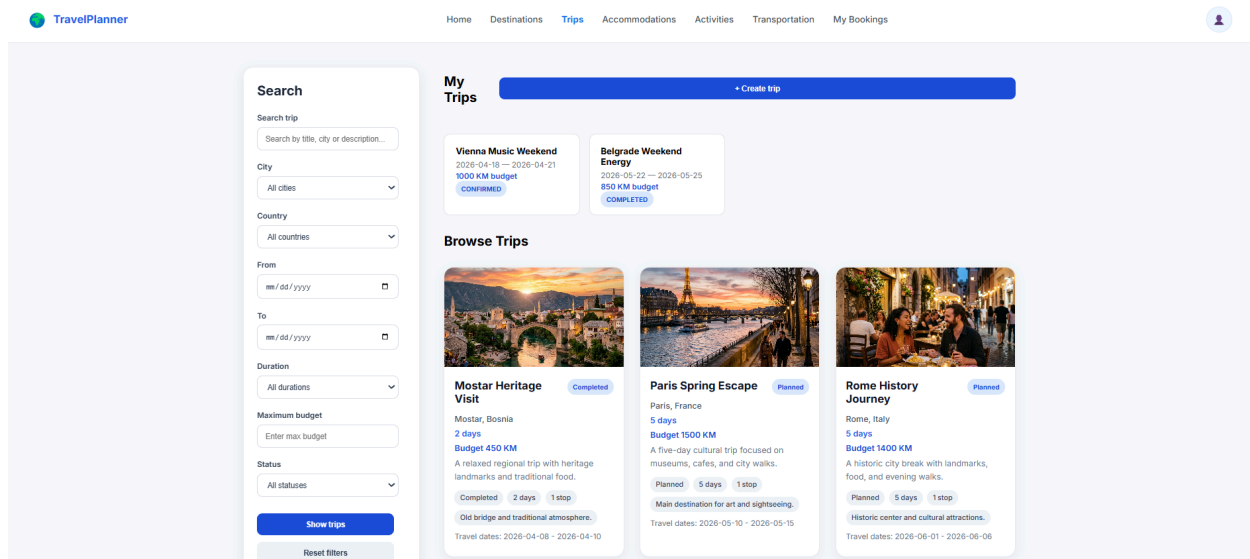

My Trips Screen - browse and create trips

The **My Trips** screen can be accessed by clicking the profile icon in the top-right corner and selecting **My Trips** from the dropdown menu. This screen allows users to view their own created trips, browse available public trips, and search or filter trips based on different criteria. The left side of the page contains a search and filter panel where users can enter a trip title or description, select a city or country, choose a date range, filter by duration, budget, or trip status, and then click **Show trips** to apply the selected filters (My Trips Screen).

The main area of the screen is divided into two sections. The **My Trips** section displays trips created by the logged-in user, together with basic trip information such as title, dates, budget, and status. Users can also create a new trip by clicking the **+ Create trip** button. Below that, the **Browse Trips** section displays available trips that the user can explore. Each trip card contains an image, destination information, budget, short description, tags, and travel dates. When the user clicks on a specific trip, the application opens the trip details screen.

How to use this screen:

1. Click the profile icon in the top-right corner.
2. Select **My Trips** from the dropdown menu.
3. Review your created trips in the **My Trips** section.
4. To create a new trip, click the **+ Create trip** button.
5. To browse other available trips, scroll to the **Browse Trips** section.
6. Use the search field to search trips by title or description.
7. Use the filters on the left side to narrow results by city, country, date range, duration, budget, or status.
8. Click **Show trips** to apply the selected filters.
9. Click **Reset filters** to clear the filters and show the full list again.
10. Click on any trip card to open its detailed overview.

My Trips Screen

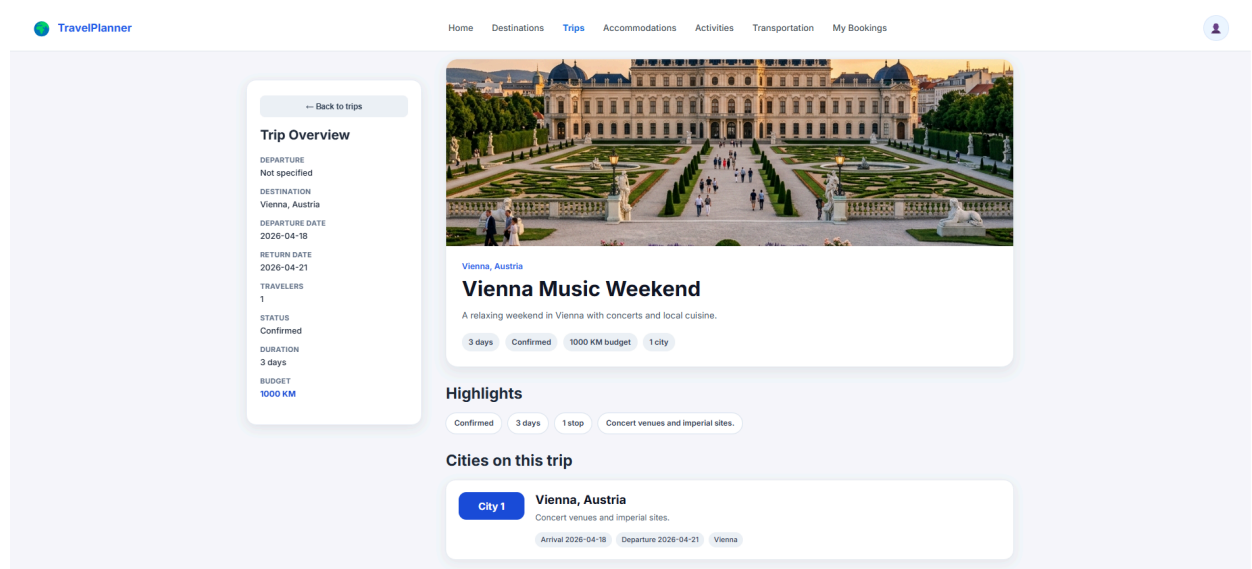

Trip Details Screen - check trip details

After clicking on a trip from the **My Trips** or **Browse Trips** section, the user is redirected to the **Trip Details** screen. This screen provides a more detailed overview of the selected trip, including the destination image, trip title, location, short description, duration, confirmation status, distance, and tags. On the left side, the **Trip Overview** panel summarizes key information such as departure location, departure date, return date, number of travelers, trip status, duration, and budget (Trip Details Screen).

The lower part of the screen contains additional trip details, including highlights and the cities included in the trip. In the shown example, the trip includes Vienna, Austria, with arrival and departure dates displayed inside the city card. The **Back to trips** button allows users to return to the previous trips overview page.

How to use this screen:

1. Open the **My Trips** screen.
2. Click on a trip card that you want to view.
3. Review the main trip information, including destination, title, description, duration, status, distance, and tags.
4. Check the **Trip Overview** panel for departure details, return date, number of travelers, budget, and trip status.
5. Scroll down to view trip highlights.
6. Review the **Cities on this trip** section to see which cities are included in the itinerary.
7. Click **Back to trips** to return to the trips overview screen (Trips Screen).

Trip Details Screen

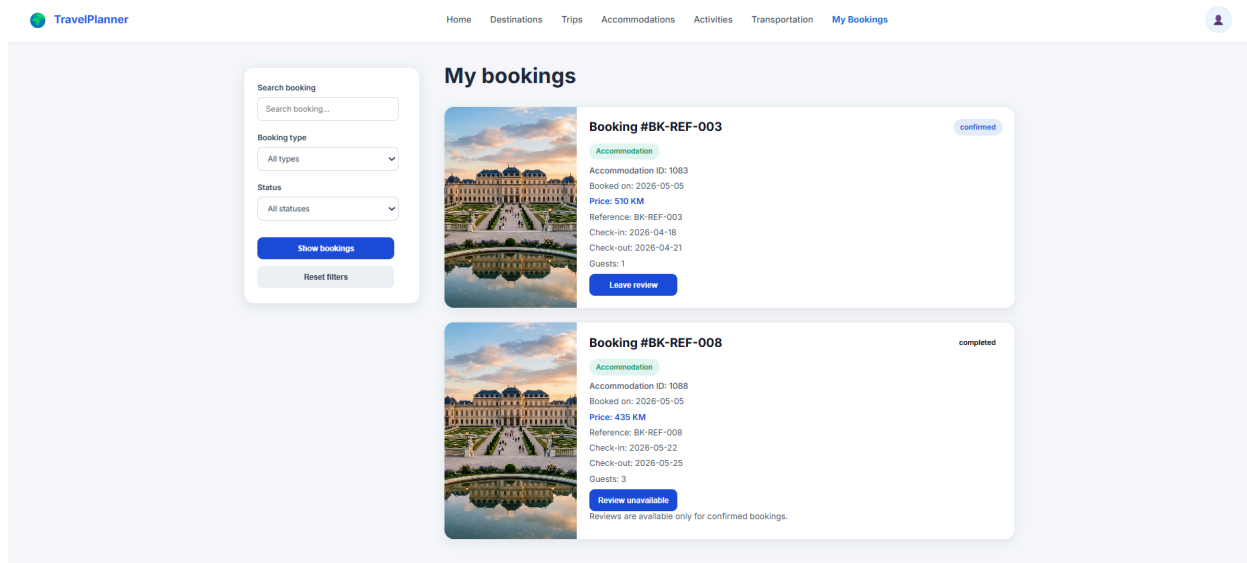

My Bookings Screen - browse previous bookings and leave reviews

The **My Bookings** screen allows logged-in users to view and manage their accommodation bookings. This screen can be accessed from the navigation bar by clicking **My Bookings**. On the left side, there is a filter panel where users can search for a booking, filter bookings by booking type, and filter them by status. The main part of the page displays booking cards with the most important booking information (My Bookings Screen).

Each booking card contains an accommodation image, booking reference number, booking type, accommodation ID, booking period, price, reference code, check-in and check-out dates, number of guests, and booking status. The booking status is displayed as a label, for example **confirmed** (if paid) or **completed** (unpaid booking). If a booking is confirmed, the user can click **Leave review** to write a review. If the review is not available, the system displays a disabled **Review unavailable** button with a short message explaining that reviews are available only for confirmed bookings.

How to use this screen:

1. Open the **My Bookings** screen by clicking **My Bookings** in the navigation bar.
2. Review the list of your accommodation bookings.
3. Use the **Search booking** field to search for a specific booking.
4. Use the **Booking type** dropdown to filter bookings by type.
5. Use the **Status** dropdown to filter bookings by booking status.
6. Click **Show bookings** to apply the selected filters.
7. Click **Reset filters** to clear the filters and show all bookings again.
8. Check each booking card to view details such as price, dates, guests, and reference number.
9. If the **Leave review** button is available, click it to add a review for that booking.
10. If **Review unavailable** is shown, the booking currently cannot be reviewed.

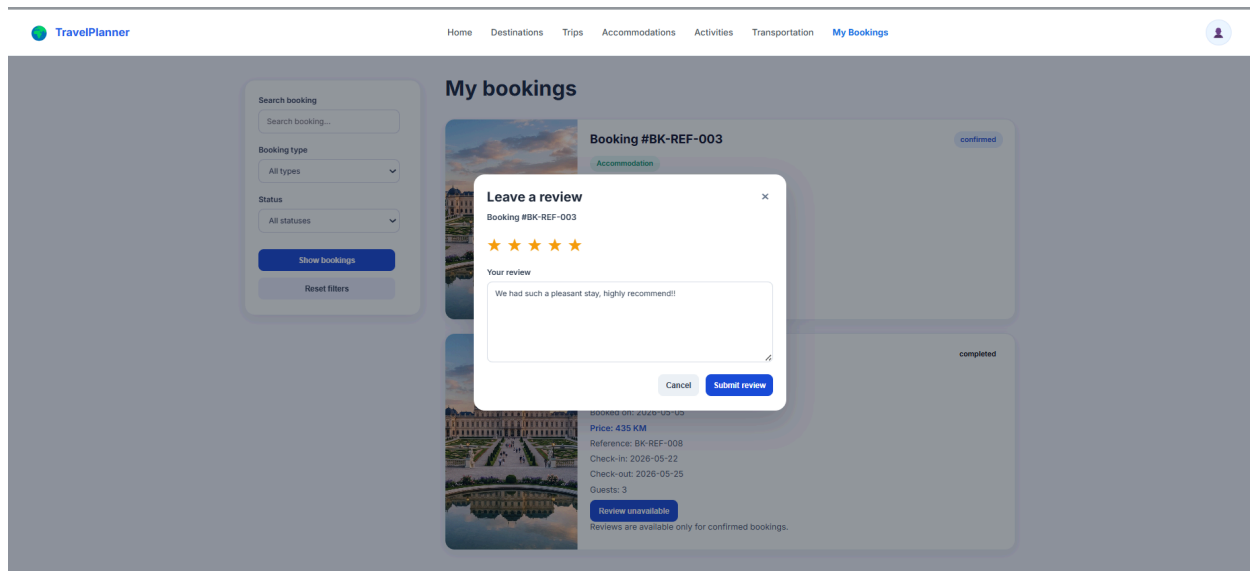

My Bookings Screen

Users can leave a review for bookings that are available for reviewing from the **My Bookings** screen. When the user clicks the **Leave review** button on a confirmed booking, a review modal opens in the center of the screen while the rest of the page becomes dimmed (My Bookings leave review). This keeps the user focused on the review form without leaving the bookings page.

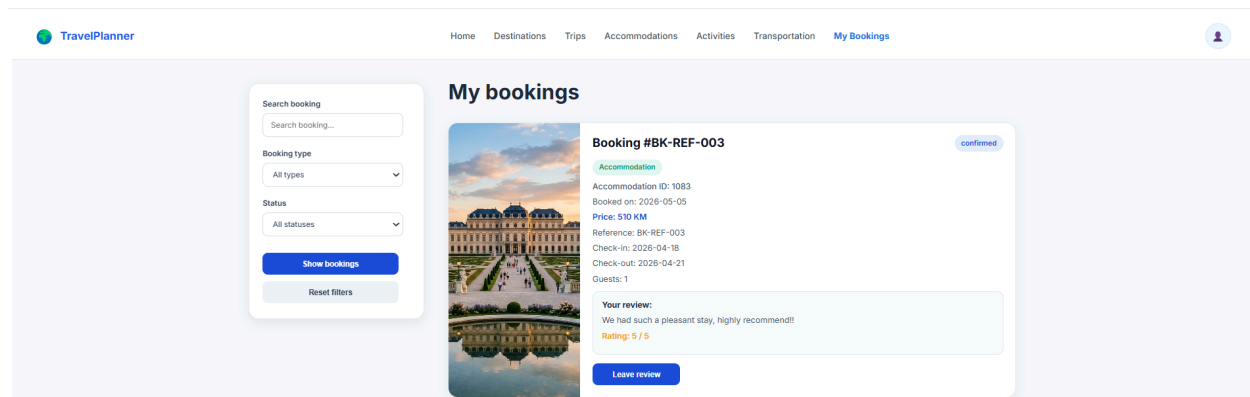

The modal displays the selected booking reference, a star rating section, and a text area where the user can write their review. The user can select a rating by clicking the stars and then enter a written comment about their experience. After completing the review, the user can submit it by clicking **Submit review**. If the user changes their mind, they can close the modal using the **Cancel** button or the **X** icon in the top-right corner.

How to use this screen:

1. Open the **My Bookings** screen.
2. Find a booking that has the **Leave review** button available.
3. Click **Leave review**.
4. In the review modal, check that the correct booking reference is displayed (My Bookings leave review).
5. Select a star rating by clicking the desired number of stars.
6. Write your review in the text area.
7. Click **Submit review** to save and submit the review. The review will then be anonymously displayed in the appropriate page as well as within the booking card (My Bookings cards with a review).
8. To exit without submitting, click **Cancel** or the **X** icon.

My Bookings leave a review

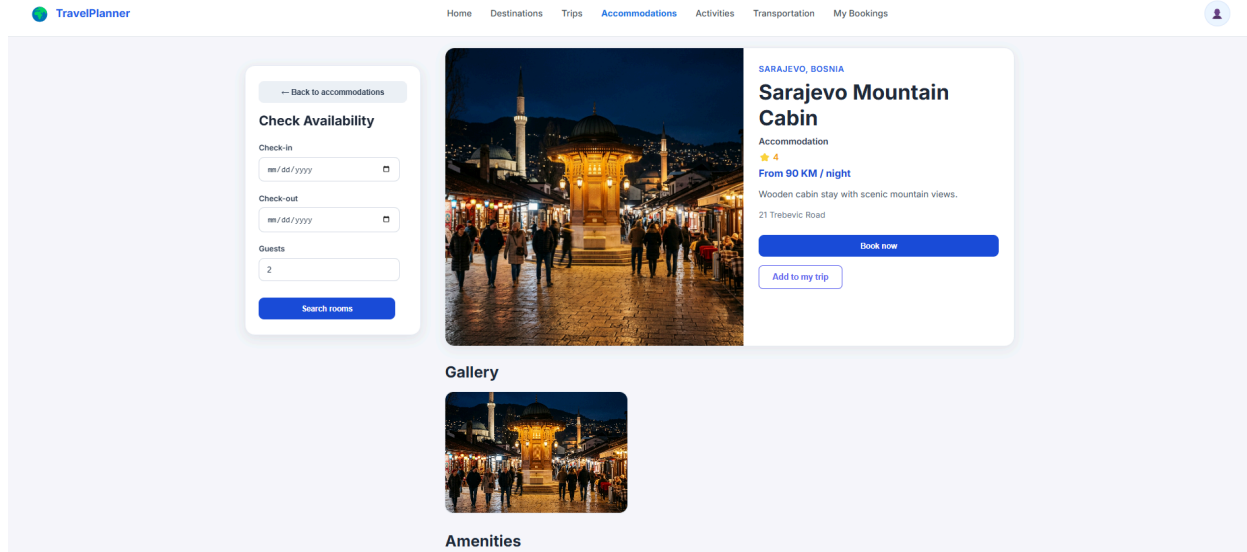

My Bookings card with a review

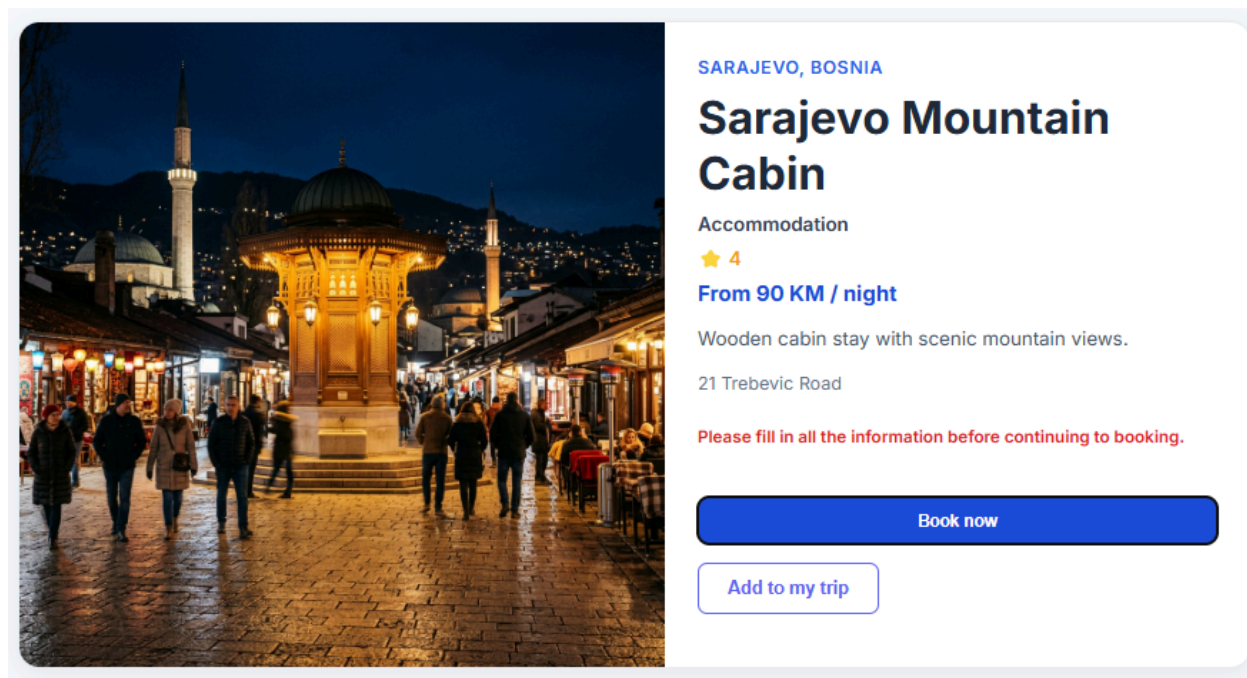

Booking and Payment Flow for Registered User

The booking and payment flow allows a registered user to reserve an accommodation and complete the payment process directly through the TravelPlanner application. When the user is authenticated, the navigation bar displays additional options such as **My Bookings** and a profile icon, and the user can manage personal trip content directly from the application. The process starts from the accommodation (Accommodation Details Screen after selecting desired accommodation) or trip details page, where the user can review the selected accommodation/trip. Before continuing to booking, the user must enter all required booking information, such as check-in date, check-out date, and number of guests. If any required

information is missing, the system displays a validation message informing the user that all information must be filled in before continuing to booking.

Accommodation Details Screen after selecting desired accommodation

Accommodation Details Screen missing information

After the required booking details are entered correctly (e.g. no incorrect dates from the past, number of guests below the limit), the user can proceed to the booking confirmation page (Confirm Your Payment Screen). This page displays a summary of the selected accommodation and booking details, including the check-in date, check-out date, number of guests, price per night, number of nights, and total price. The user can review this information before continuing. By clicking **Continue to payment**, the user is redirected to the payment screen, where the booking summary is shown again together with the available payment methods.

Complete Your Booking Screen

On the payment screen, the user selects a payment method, such as credit card, debit card, PayPal, bank transfer, cash, or another available option. If a card payment method is selected, the user must enter valid card details. When invalid card data is entered (Payment Screen invalid card number), the card field displays an error state, indicating that the payment information is not valid. When valid payment details are entered (Payment Screen valid data), the user can click the **Pay** button to complete the transaction. After a successful payment, the system displays a booking confirmation message (Booking confirmation), confirming that the payment was successful and that the booking has been confirmed. The user can then click **View my bookings** to open the list of their bookings, or **Download Invoice** to get a pdf file of the invoice (Invoice PDF).

Booking confirmation

A booking confirmation is also sent to the user by email (Booking confirmation email). The email contains the booking confirmation message, booking ID, paid amount, and a short note confirming that the reservation has been successfully processed. This provides the user with additional confirmation outside the application.

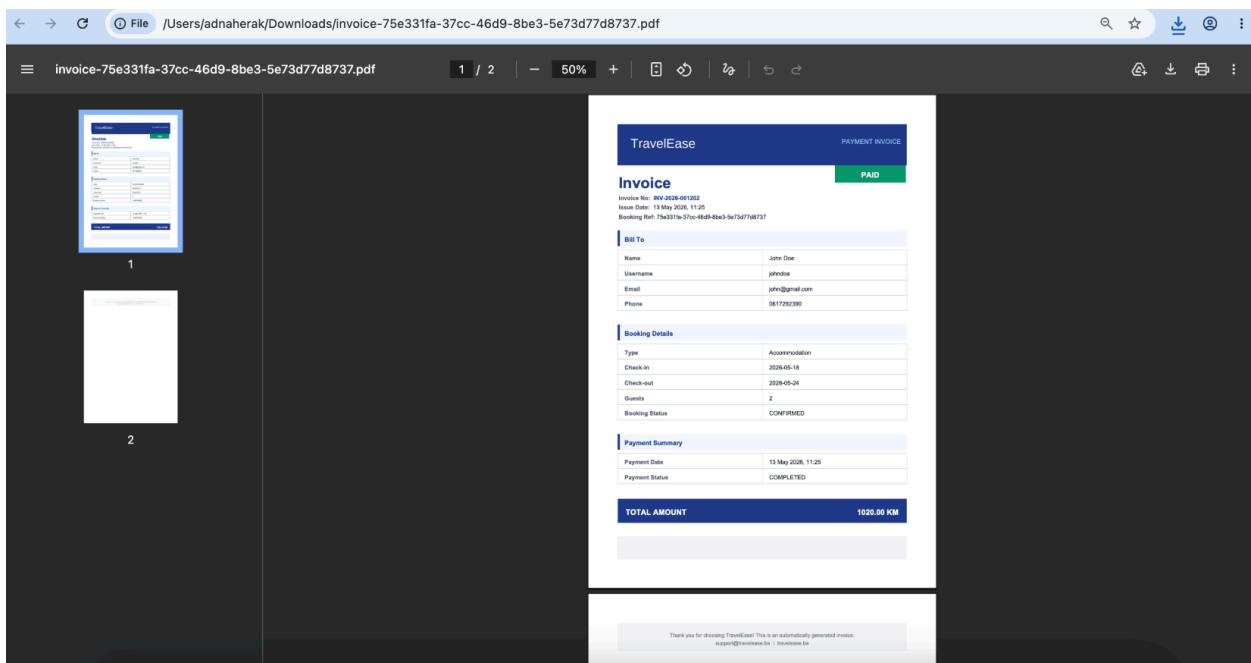

Booking confirmation email

The booking is then successfully saved in the system and can be checked via My Bookings screen.

My Bookings Screen with a new booking

Invoice PDF

How to book and pay:

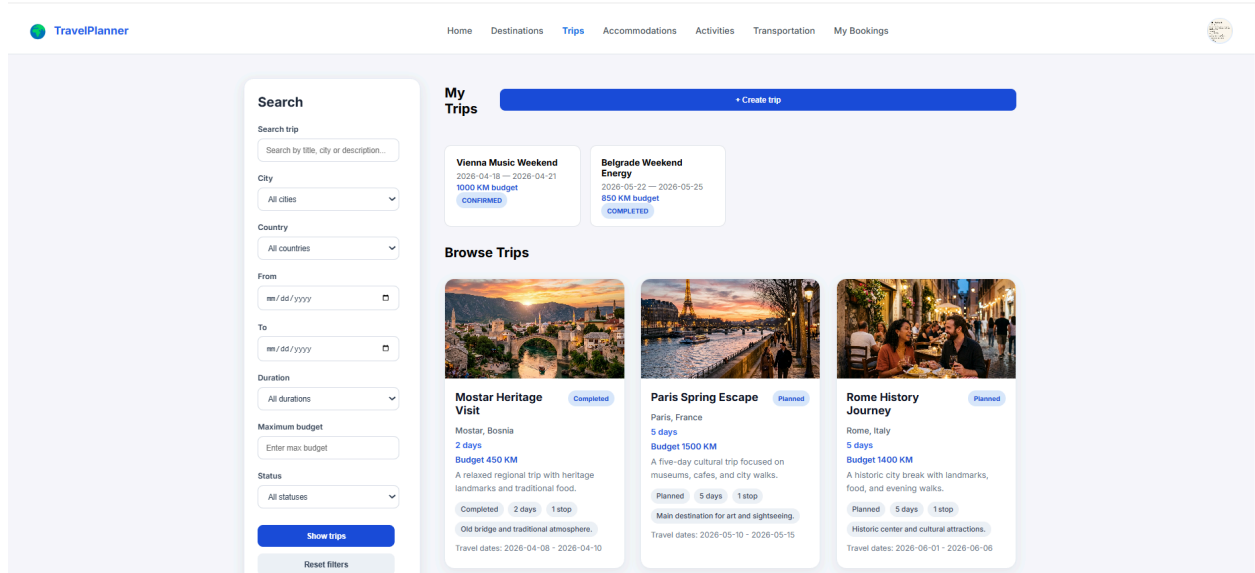

1. Log in to your TravelPlanner account.
2. Open the **Accommodations** section from the navigation bar.
3. Select the accommodation you want to book.

4. On the accommodation details page, review the accommodation information, including price, rating, description, and location.
5. Enter the required booking information:
 - check-in date,
 - check-out date,
 - number of guests.
6. Click **Book now**.
7. If required information is missing, the system will display a warning message asking you to complete all booking details.
8. After entering valid booking details, the **Complete your booking** screen opens.
9. Review the booking summary, including dates, guests, number of nights, and total price.
10. Click **Continue to payment**.
11. On the payment screen, review the booking summary again.
12. Select the preferred payment method.
13. If using a card payment method, enter the required card details.
14. If the entered payment data is invalid, correct the highlighted card information.
15. After entering valid payment details, click the **Pay** button.
16. When the payment is successful, the system displays the **Booking confirmed** message.
17. Click **View my bookings** to see the confirmed booking in your bookings list.
18. Check your email inbox for the booking confirmation email.
19. Select Download Invoice to get a pdf file of the invoice for the specified booking (Invoice PDF).

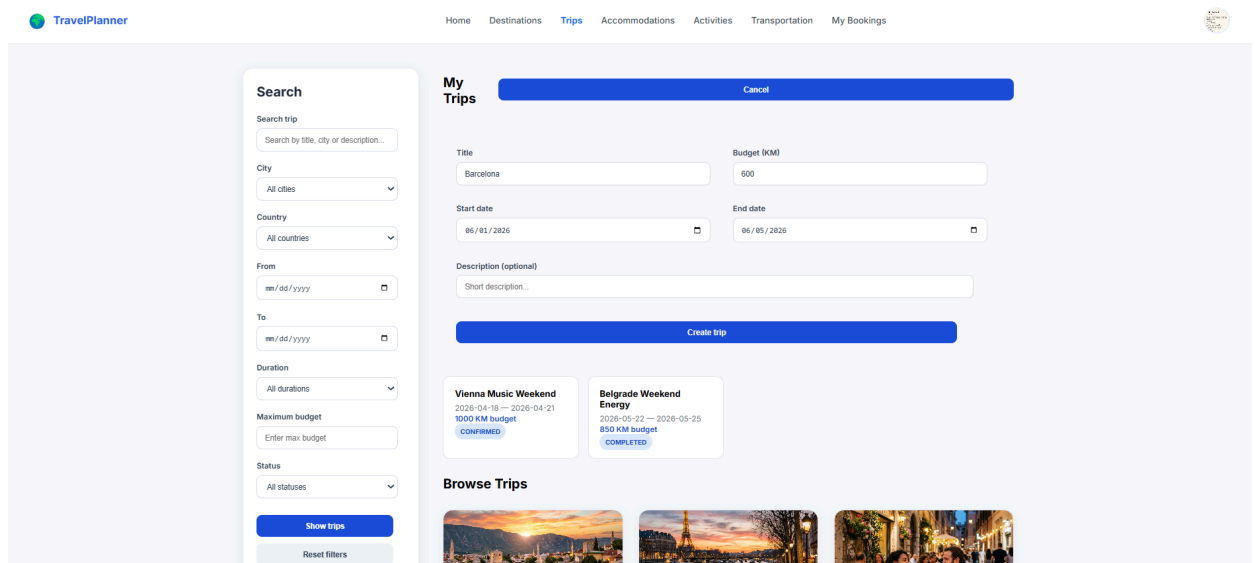

Adding Items to a Trip, Booking, and Payment Flow

The TravelPlanner application allows registered users to create personal trips and add different travel items to them, including **accommodations**, **activities**, and **transportation**. This flow is available only after the user is logged in. When the user is authenticated, the navigation bar displays additional options such as **My Bookings** and a profile icon, and the user can manage personal trip content directly from the application. If a guest user tries to perform actions such as booking or adding items to a trip, the application redirects the user to the login page.

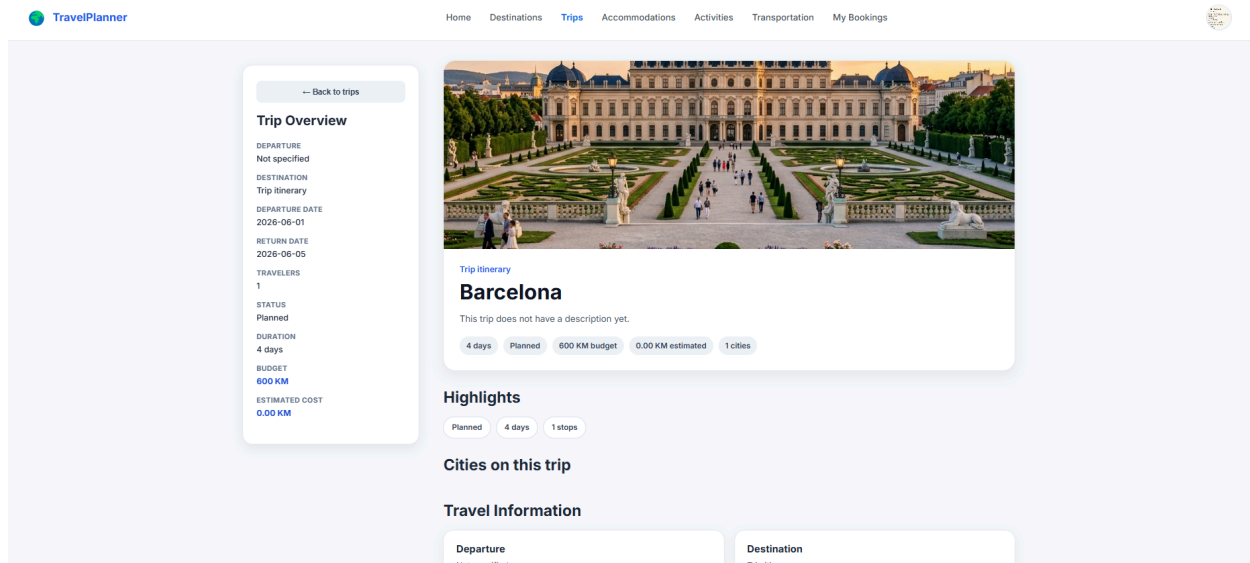

Users can also create a new personal trip from the **Trips** page (My Trips Screen). In the **My Trips** section, the user clicks **Create trip**, enters the trip title, budget, start date, end date, and optional description, and then submits the form. After the trip is created, it appears in the user's trip list and can be opened to view its details. The trip details page shows the overview, travel information, cities included in the trip, estimated cost, and added items such as accommodation, transportation, and activities (My Trips Screen trips creation).

My Trips Screen

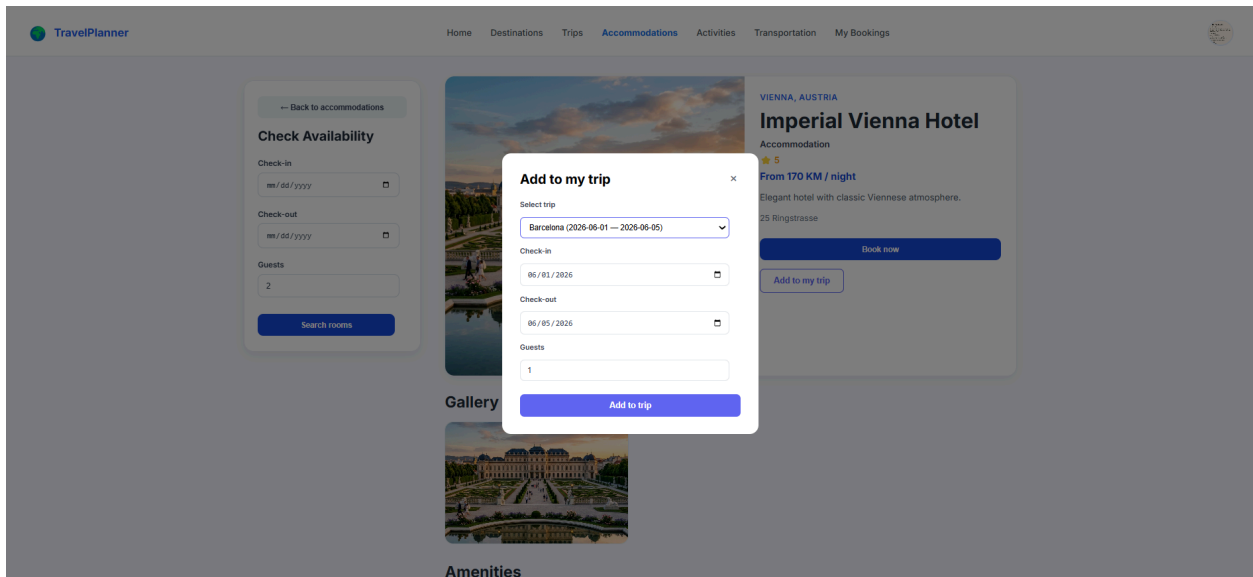

My Trips Screen trip creation

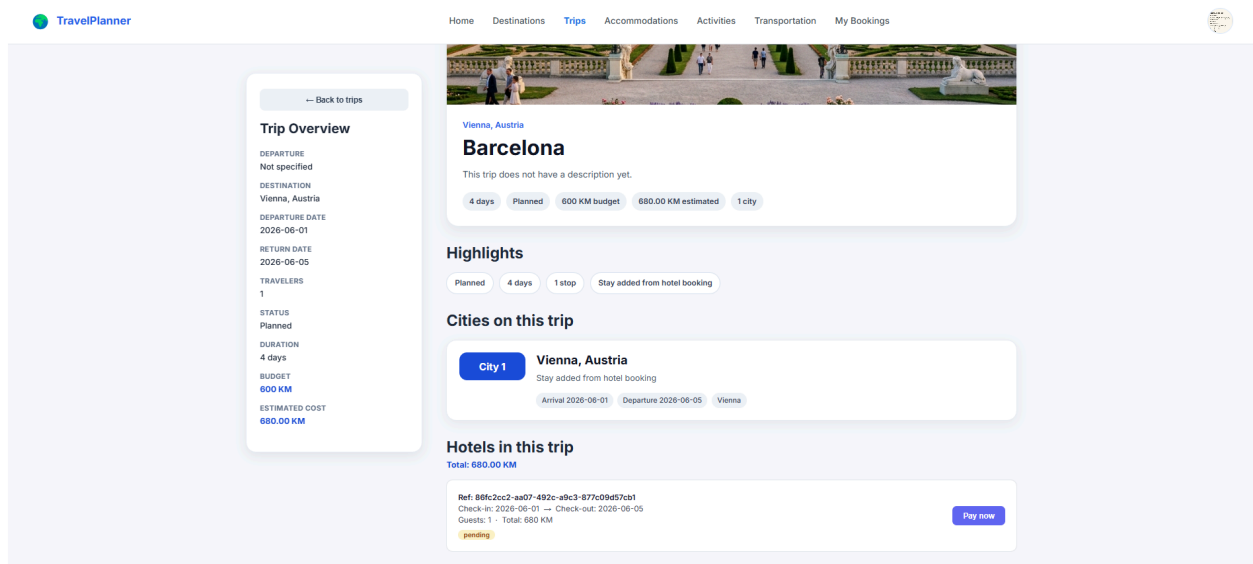

Created trip details

Users can add accommodation (Adding accommodation) to a trip directly from the accommodation details page by clicking **Add to my trip**. After clicking this button, a modal window appears where the user selects the trip, enters check-in and check-out dates, specifies the number of guests, and confirms the action by clicking **Add to trip (Adding accommodation)**. Once the accommodation is added, it becomes visible inside the selected trip details page (Trip details), under the hotel or accommodation section. This allows the user to review the accommodation as part of the overall travel plan before continuing with booking and payment.

Adding accommodation

Trip details

Transportation and activities can also be added to a trip, but they are booked and paid for through the **My Trip** flow. For example, after selecting a transport option, the user clicks **Add to trip**, reviews the trip details, and can continue to the payment screen to book the trip.

How to create a trip and book:

1. Log in to the application.
2. Open the **Trips** page.
3. In the **My Trips** section, click **Create trip**.
4. Enter the trip title, budget, start date, end date, and optional description.
5. Click **Create trip** to save the new trip.
6. Open an accommodation, activity, or transportation option.
7. Click **Add to my trip**.
8. Select the trip where the item should be added.
9. Enter the required details, such as dates, number of guests, or number of travelers.
10. Confirm the action.
11. To book transportation and activities, continue through the booking and payment process from the selected trip.
12. Select a payment method and complete the payment.
13. After successful payment, check the confirmation email and review the booked item inside the trip.
